Education

University of Waterloo

Bachelor of Computer Science (Honours)

2025 – 2030

Waterloo, Ontario

Profile

Full Stack Developer with proven experience building scalable MEAN stack applications and enterprise procurement systems at Penny.co. iOS development background from Apple internship. Demonstrated ability to deliver features across the full stack—from backend REST APIs to responsive Angular frontends. Strong track record of technical leadership and shipping production code that solves real business problems.

Experience

Penny.co

June 2025 – Present

Full Stack Developer

Riyadh, Saudi Arabia

- Built **delegation feature for RCMC procurement system**—a core functionality enabling multi-user workflows and enterprise-level task management.
- Implemented **Arabic localization** to expand market reach in Saudi Arabia, including RTL text rendering and regional compliance considerations.
- Designed and shipped **filter-saving feature** that eliminated repetitive configuration, improving user retention and workflow efficiency.
- Developed **REST APIs and Angular components** using the MEAN stack, collaborating closely with design and QA teams to deliver production-ready features.

First Robotics

Nov 2023 – June 2025

Programming Team Head

Hamilton, ON

- Led autonomous and manual control systems development using Java and Raspberry Pi; drove team to **first place at Niagara College championship**.
- Mentored junior developers and established **Git workflows**, enabling consistent code quality and seamless team collaboration across a competitive program.

Apple INC

June 2024 – August 2024

Mobile App Developer

Hamilton, ON

- Shipped **Swift-based iOS application** with focus on UI/UX polish and reliable backend API integration during co-op rotation.
- Translated user requirements into technical implementation, directly supporting product decisions and feature iterations.

Freelance Developer

Jan 2023 – June 2025

Full Stack Developer (Concurrent)

Canada & Saudi Arabia

- Delivered **full-stack web solutions** using HTML, CSS, JavaScript, NestJS, and Angular for remote clients while pursuing internships and studies.
- Managed client relationships and project timelines across multiple concurrent engagements in competitive procurement and SaaS sectors.

Projects

MEAN Stack Enterprise Applications | *Node.js, Angular, MongoDB*

2023 – Present

- Architected and deployed multiple production applications with secure authentication, role-based access control, and complex data workflows.
- Designed RESTful APIs and responsive Angular frontends serving enterprise clients across procurement and SaaS domains.

First Robotics Control Systems | *Java, Raspberry Pi*

2023 – 2025

- Engineered autonomous robot controls that competed at national level; led team to first place championship at Niagara College.

Technical Skills

Languages: JavaScript, TypeScript, Java, Swift, HTML, CSS, SQL, C

Frontend: Angular, React, HTML5, CSS3, Bootstrap, Material Design

Backend: Node.js, NestJS, Express, MongoDB, Firebase, REST APIs

Tools & Platforms: Git/GitHub, Agile/Scrum, Raspberry Pi, Linux, VS Code
