Education

University of Waterloo

Bachelor of Computer Science (Honours)

2025 – 2029

Waterloo, Ontario

Profile

Full Stack Developer building enterprise procurement software at Penny.co, including an in-house contract management platform and an AI assistant for RFQ/RFP creation and approval automation. Experienced across the MEAN stack, from NestJS REST APIs to Angular frontends, with iOS prototyping experience from an Apple education co-op.

Experience

Penny.co

June 2025 – Present

Full Stack Developer

Remote (Riyadh, Saudi Arabia)

- Built an **in-house contract management system** to replace DocuSign for **Tahakom** (Saudi Arabia), covering contract drafting, e-signature, and tracking; generated **\$150K+ in revenue** for Penny.
- Developed an **AI assistant that generates RFQs/RFPs** from user input and **automates approval routing**, reducing manual request handling time by **50%**.
- Built the **delegation feature for the RCMC procurement system**, enabling organization-wide approval workflows that scale to **1,000+ users**.
- Implemented **Arabic localization** (XLIFF, RTL layouts) across procurement UI to support the Saudi market.
- Shipped **filter saving** and standardized table filter/pagination state by rolling out a shared interface across **25+ Angular components**; fixed AG Grid state-loss bugs on navigation.
- Hardened **NestJS vendor RFQ endpoints** to return controlled 404s instead of 500 errors for invalid guest tokens.

Apple Education Co-op Program

June 2024 – August 2024

Student App Developer (Co-op with HWCDSB)

Hamilton, ON

- Prototyped an **AI-powered calorie tracking iOS app** in Swift: users upload a meal photo, the app identifies each food item and estimates its calories.
- Built **image-based food detection** and a UI showing a **per-item calorie breakdown**, turning a single photo into a full nutritional estimate.

First Robotics

Nov 2023 – June 2025

Programming Team Head

Hamilton, ON

- Led autonomous and manual control systems development using Java and Raspberry Pi; drove team to **first place at Niagara College championship**.
- Mentored junior developers and established **Git workflows**, enabling consistent code quality across the team.

Freelance Developer

Jan 2023 – June 2025

Full Stack Developer

Canada & Saudi Arabia

- Delivered **full-stack web solutions** using HTML, CSS, JavaScript, NestJS, and Angular for remote clients in procurement and SaaS.
- Managed client relationships and project timelines across multiple concurrent engagements while pursuing studies.

Projects

MEAN Stack Enterprise Applications | Node.js, Angular, MongoDB

2023 – Present

- Architected and deployed production applications with secure authentication, role-based access control, and complex data workflows.
- Designed RESTful APIs and responsive Angular frontends serving enterprise clients across procurement and SaaS domains.

First Robotics Control Systems | Java, Raspberry Pi

2023 – 2025

- Engineered autonomous robot controls for competition play; led the team to a first-place championship at Niagara College.

Technical Skills

Languages: JavaScript, TypeScript, Java, Swift, HTML, CSS, SQL, C

Frontend: Angular, AG Grid, PrimeNG, React, Bootstrap, Material Design

Backend: Node.js, NestJS, Express, MongoDB, Firebase, REST APIs

AI: LLM-powered features, workflow & approval automation, image recognition

Tools & Platforms: Git/GitHub, Agile/Scrum, Raspberry Pi, Linux, VS Code
